SYNERGY 303

Instructions

Includes:

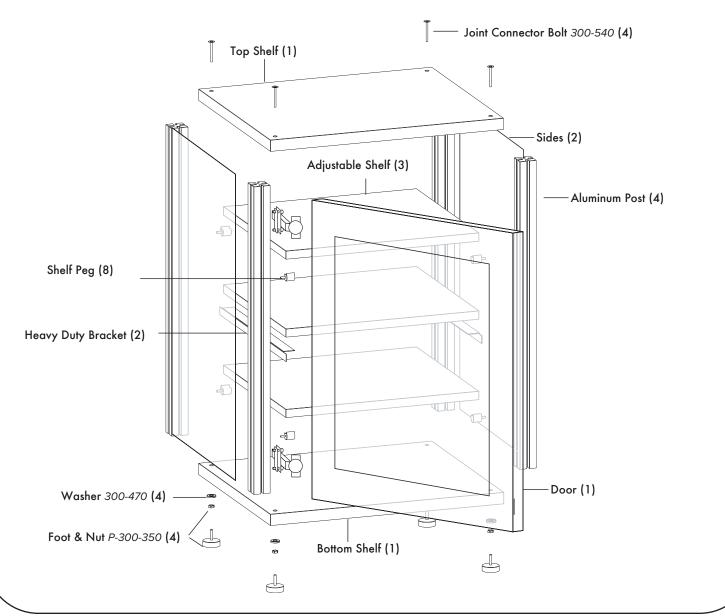

- (1) SU30 Synergy Base Unit
- (1) \$\$30 30" Side Panel Set
- (1) SD30 30" Doors

BEFORE YOU BEGIN:

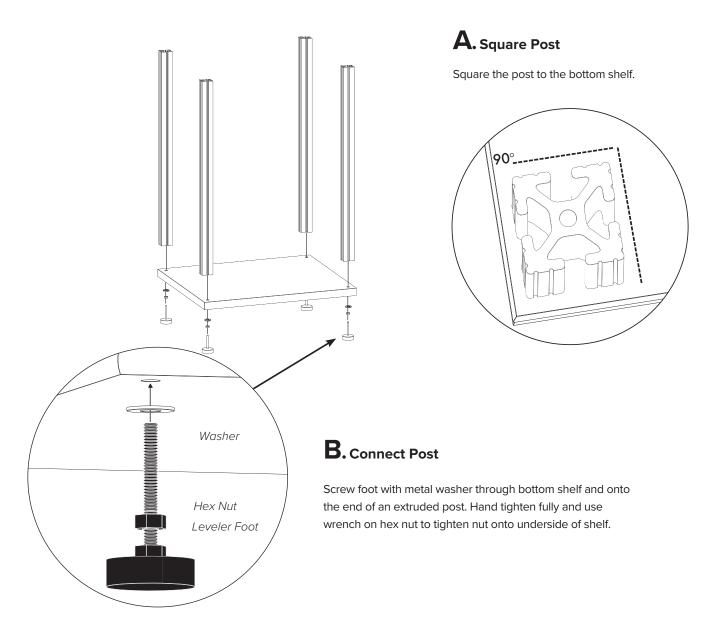

- Unpack all parts before beginning and refer to the drawing below.
- Shelf pegs and door hinges must slide into the channels of the post in the correct order.
- They cannot be removed individually without disassembling the whole unit.

1 Connect Posts to Bottom Shelf

WARNING: Tighten by screwing the leveler foot NOT the post.

2 Add Shelf Pegs & Door Hinges

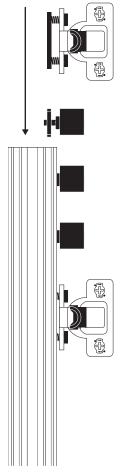

A. Shelf Pegs

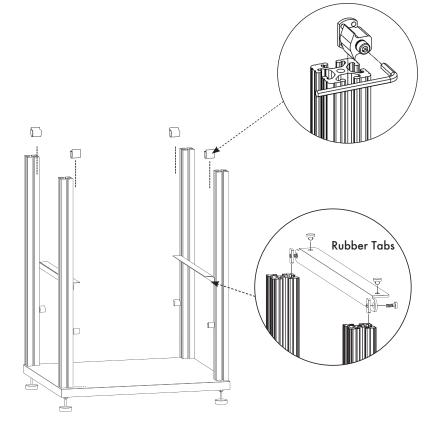

They are designed to cradle the shelf in place. Refer to drawing. For Glass Cabinets, heavy duty brackets are used in place of shelf pegs.

B. Insert Hinges, Shelf Pegs & Heavy Duty Bracket

Note: The door can be either left or right side opening. Select a side to open door.

- Hold door above the post and slide the bottom hinge plate through the post channel.
- Insert shelf pegs and heavy duty bracket.
- Slide top hinge plate through.
- Gently tighten all remaining pegs with the hex key to desired position.
- 5. For Glass Cabinets, install one shelf peg on the post opposite of the door hinges. Center it between the hinges vertically to act as a door stop.

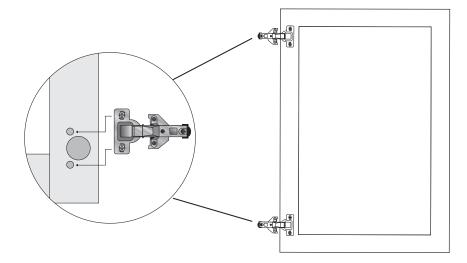

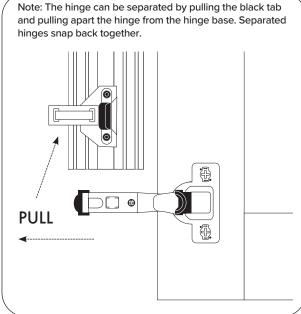

3 Attach Door

A. Attach Hinges to Door Frames

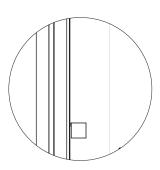

Insert the hinges into the corresponding holes on the doors. Turn the screws 1/4 turn to the right to lock hinges in place. NOTE: Do not over tighten or the hinge will break.

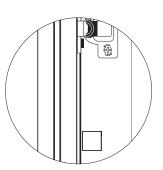

B. Adjust Clearance

Doors should be 1/8" above the bottom shelf before fully tightening hinges to post. Use the wrench thickness as a guide for the bottom gap.

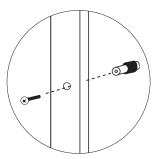

C. Rubber Stops

Attach the rubber stops to the inside of the door frame where it hits the shelf pegs when closing the door.

D. Door Pull

Screw the Door Pull into place. **Wood Doors Only.**

4 Attach Rear Panel

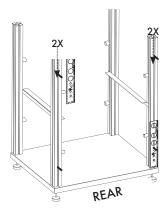

A. Insert Hardware

Combine the 1" threaded studs with the flat nuts. Slide hardware into rear channel.

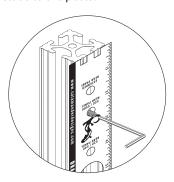

B. Place Panel

Allow bottom studs to remain loose at bottom of post. Align the Spacer Tool at the top of the post, then position top studs through the small "Rear Panel" hole. Repeat this step with the bottom studs aligning the Tool along the bottom of post to set spacing for cable passage.

C. Secure Studs

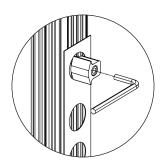

Use the hex key to secure the all studs to the posts.

5 Final Assembly

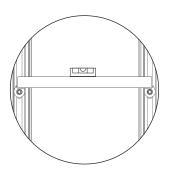

A. Placing & Adjusting Shelves

Place shelves from the bottom up. Angle the shelf in between the front post and set on top of shelf pegs. Use the Spacer Tool to adjust spacing between shelves. Position the peg through the Spacer and tighten.

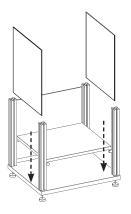

B. Fine Tuning

Use the bubble level to precisely adjust the shelves. Be sure to level both sides as well as front to back. Use the hex key to tighten each peg.

C. Insert Side Panels

Carefully slide side panels down center channel of outside post. Be sure the posts are square to the bottom shelf to prevent any damage to side panels.

D. Secure Rear & Top

Put the remaining thumb nuts on to complete panel installation.

Limited Warranty

For five full years Salamander Designs Ltd. will repair or replace, at our option, any product defective in materials or craftsmanship. Salamander Designs Ltd. will not be responsible for any damage to or destruction of other equipment consequential to our equipment failure. Defective product must be given Return Authorization and is to be returned to the factory prepaid, in the original carton and packing material. Any damage incurred in a shipment not in original packaging shall be the responsibility of the owner. Warranty repairs will be returned prepaid, via UPS within the continental U.S.A. only.
